Re: Recycled content of IWP finished wire products-Wire Mesh related products

Insteel Wire Products Company uses wire rod from many sources. In an effort to determine the recycled content for its wire products from multiple wire rod sources, IWP maintains on file a Recycled Content Letter from each of its rod vendors. Thus an average can be calculated for all wire products produced by IWP. Please use the following table for your inquiries regarding recycled content of IWP finished products.

Post-Consumer Scrap Content % 68.4	Pre-Consumer (Post-Industrial) Scrap Content % 26.0	Total Recycled Content % 94.4	Other Iron Units And Ferro-alloys Content % 5.6
